## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner is unaware of a semiconductor device with a ferroelectric memory cell wherein the drain of a first transistor is coupled to the floating gate (beneath the ferroelectric layer) of a second transistor while the source region of the first transistor is coupled to the well region of the second transistor.
3. Tani (USPN 6,459,110 B1) discloses a semiconductor device with a ferroelectric memory cell. Although one of the transistors is coupled to a ferroelectric capacitor, the other transistor is directly coupled to the sense amplifier and the data readout drive section. Thus Tani does not disclose the applicant's device.
4. Haneder et al. (United States Patent Application Publication 2001/0038117 A1) discloses another ferroelectric memory cell in figure 6. Such as Tani above, Haneder lacks the distinct configuration described by the applicant with regard to the ferroelectric device. Therefore Haneder does not teach the applicant's invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Quinto whose telephone number is (571) 272-1920. The examiner can normally be reached on M-F 8AM-5PM.
